ABSTRACT

A survey was administered to all 2,640 1977-78 graduates of the Hawaii community college system. General, academic, and employment information, as well as a general evaluation of the college experience, were elicited and a 59% response rate was achieved. There were statistically significant differences between respondents and non-respondents on the following characteristics: sex, program, degree/certificate, grade point average, and campus. Approximately 87% of the respondents were either working or attending school or engaged in both activities. The majority (86%) of those continuing their education at four-year institutions were able to tranfer credits without difficulty. Of the employed students, 41% were employed in clerical/sales work; 20%, in professional, technical, or managerial work; and 46% said they were employed in a field related to their training. In evaluating the general college experience, the proportion who gave favorable ratings was slightly higher among the present respondents than among the previous year's respondents. More than 45% felt that the colleges had been a "great deal of help" in meeting their goals. Data are analyzed for the community college total and for each of the seven colleges in the system. Extensive tables, presenting the survey results, and the survey instrument are appended. (MB)

MEMORANDUM January 31, 1979

TO: Recipients of CC-IRP 119, Survey of the 1977-78 Graduates

The 1977-78 Alumni Survey was administered to all graduates of the University of Hawaii, including those of the community colleges. This report summarizes the findings for community college graduates, only.

Please note that the data are summarized by campus. However, we have sent to each Dean of Instruction and Dean of Students (two per campus) the following computer printouts:

(a) Results of the alumni survey, by program

(b) Current Activities, summarized by OE categories, for the total and for special groups (handicapped, disadvantaged, veterans) to respond to various questionnaires.

Additionally, the survey forms were returned to the Deans of Students. We hope that these additional details will enable you to do in-depth study of the responses, by program.

The information on the current activities and reports should be especially helpful for evaluating and planning purposes.

Please feel free to call Irene Nakamura (948-7471) for further information or if we can be of assistance to you.

SURVEY OF 1977-78 GRADUATES COMMUNITY COLLEGES

Introduction

A survey of all 1977-78 graduates of the University of Hawaii (10 campuses including 7 community colleges) was conducted by the Office of the Director of Finance with the assistance of campus personnel and the educational support unit of the community college system. This is the third survey of all University of Hawaii graduates. (See Student Flow Reports No. 22 and 35 for results on the 1975-76 and 1976-77 community college graduates.)

This report presents the responses of 1977-78 community college graduates to the University's Alumni Survey. Major findings for the community college total, by campus, are provided. Computer reports presenting details, by program, have been sent to the campuses.

The Questionnaire

Questionnaires were sent to 2,640 1977-78 community college graduates in September 1978. The responses were edited, coded and key-punched. In December 1978, a computer file was created to combine the responses from community college graduates and data from the University's student information system.

The questionnaire (Appendix A) is divided into several parts:

- --General Information (questions on semesters attended and current activities)
- --Academic Information (questions on full-/part-time status, current school, degree objective, major field)
- --Employment Information (questions on full-/part-time status, occupation, current employer, employment location, length of employment, annual earnings, primary source for information about the job, job/career relationship, job/study relationship)
- --General Evaluation of College Experience (campus helpfulness in attaining each of 14 goals, student satisfaction regarding 9 areas, student satisfaction regarding 21 campus services)

Highlights

I. General Information: (Tables I-V)

The return rate this year was 59 percent (1,552) for the community college total. The rates, by campus, ranged from 54 percent to 69 percent. (The comparable rate for the community college total last year was 65 percent.)

There were statistically significant differences between respondents and non-respondents to the Alumni Survey on the following characteristics: sex, program, degree/certificate, grade point average and campus.

As was true last year, the great majority took either 3-4 semesters or 5-6 semesters (38 and 34 percent, respectively) to complete their degrees.

Over 80 percent of the graduates completed their degrees without a break in attendence.

87 percent of respondents are either working or attending school or engaged in both activities.

47%	733	working (643, full-time)
12%	190	attending school (162, full-time)
28%	434	working and attending school

II. Academic Information: (Tables VI-X)

Two-thirds of those attending school are full-time students.

Of those continuing their education, 37 percent are doing so at the Manoa Campus; 44 percent, at one of the community colleges.

Over half (57 percent) are seeking baccalaureate degrees.

Social sciences, business administration and the humanities are the areas which attracted the highest number of student majors (14, 13 and 11 percent, respectively).

The great majority (86 percent) of those continuing their education in four-year institutions were able to transfer credits without difficulty.

III. Employment Information: (Tables XI-XVIII)

Of the 1,190 graduates who indicated they are working, 68 percent are working full-time.

The plurality of graduates (41 percent) are employed in clerical/sales work; 20 percent, in professional-technical-managerial work. (Last year, 10 percent were working in the latter category. The increase this year is partly due to the reclassification of certain employment categories from "service" to "professional-technical", especially in the health area; e.g., medical lab technician.)

Private industry continues to be the chief employer of our graduates (58 percent).

Graduates tend to find employment on the islands on which their colleges are located.

Of those working full-time, 22 percent indicated they are earning between $10,000-$14,999 while 21 percent each indicated they are earning between $6,000-$7,499 and $7,500-$9,999.

A third of those working found their jobs by applying personally to the employer while a fourth had held the same jobs while they were attending college.

37 percent will probably make their present occupations their careers and 26 percent felt they will definitely make their present jobs their careers.

46 percent of those working said they are employed in a field related to their training; 24 percent, "somewhat" related to their studies.

The most frequently cited reasons for not working in a field related to their college majors are "didn't look" (40 percent) and "can't find a job" (24 percent).

IV. General Evaluation of College Experience: (Tables XX-XXIII)

For most of the items, the proportion of graduates who gave favorable ratings to the colleges is slightly higher among this year's respondents compared to those of last year.

More than 45 percent of those responding felt the colleges had been a "great deal of help" in meeting the following goals:

get a degree
broaden educational background
prepare for a career
improve knowledge/skills
gain practical experience
prepare for futher education
gain knowledge for personal use
meet people and make friends
other

More than 45 percent of those responding were "very satisfied" with the following college experiences:

knowledge gained from courses in major
overall quality of instruction
accessibility of instructors
total college experience

Over 45 percent of those responding were "very satisfied" with the following college services:

financial aid
student employment
library

Half of the respondents felt that their college experiences have made and will continue to make an appreciable difference in the quality of their lives, i.e., their lives have been enriched.

SUMMARY

59 percent of the 2,640 graduates responded to the annual survey of graduates. The data show that 87 percent are working or attending school or are engaged in both activities. In contrast to last year's graduates, a slightly greater proportion of 1977-78 graduates gave favorable ratings: i.e., more felt the campuses had been helpful in fullfilling goals, and more were "very satisfied" with their campus experience and college services.

Details, by program, are available in computer printouts sent to the campuses. Campus personnel are encouraged to do in-depth studies of their alumni's reaction in more specific terms i.e., by program. Information of this nature is helpful in assessing and in planning programs.
